

SECURITY OF YOUR FUNDS

At AI-4X, the safety and security of our clients' funds is prioritised. Here's how our e-money partners ensure your money is protected:

Regulated By The FCA

We partner with FCA-Regulated e-money institutions - *such as ebury* - to ensure compliance with the highest regulatory standards. Providing your business with an extra layer of protection over your funds.

Segregated Client Accounts

Your funds are held in segregated client funds accounts, separate from operational accounts and specific to each client. This segregation ensures that your money remains safe and ring-fenced at all times.

Transparency

Our partners are committed to continuous improvement and transparency. Regular reviews and updates of security measures are held to stay ahead of emerging threats and provide you with the highest level of protection.

Fintech Systems

Your funds are safeguarded through innovative investment bank fintech systems. This advanced technology ensures secure and efficient handling of your transactions.
